### **Avant Technology is relocating to new facility in Pflugerville, TX**

**November 12, 2009** - Avant Technology, a leading manufacturer of computer memory modules, is excited to its relocation on January 2010 to a new 50,400 sq. ft. state-of-the-art production facility in Pflugerville, TX. Established in 1985, Avant began as a distributor of computer components and over the past 25 years we have been fortunate enough to experience continued growth and success.

Today, we are a leading manufacturer and global distributor of computer DRAM modules and Flash memory products for the computing, telecommunications and data industries. Thus so, we have now out-grown our current location and are relocating from Austin, TX to the million sq ft industrial office park, Verde Springbrook Corporate Center in Pflugerville, TX, twenty minutes north of Austin.

Our General Manager, Todd Hector states, "With our continued growth, Avant needs additional space for our expanding business. Pflugerville is an ideal location for our future growth, relocating here will not only provide extra production space for Avant, but will also benefit our customers in numerous ways."

Avant's new facility features a streamlined building design with 50% more production space and equipment additions. Thus so, we will double our capacity in 2010, enabling Avant to further improve our delivery times, product mix, and cost competitiveness. Located near major roadways, the facility is ideal for shipping and receiving convenience and speedy product delivery.

Relocating to Pflugerville will offer Avant's employees great advantages including, an excellent housing market, educational advantages, community events and an overall close knit family atmosphere with open arms to a new business.

The GM states, "We believe that our continued growth is a direct result of our customer's success and we will continue to provide our customers with the highest quality memory and world-class service they have come to expect from Avant."

### **About Avant Technology**

Established in 1985 - Avant Technology is a leader in the manufacture and distribution of DRAM module and data storage technologies. Since 1985, we have specialized in leading edge and legacy memory modules for OEMs, system builders, resellers, and wholesale distributors worldwide. Not only do we offer a full-line of module solutions, we also manufacture an innovative line of flash memory product.
