DESCRIPTION

The AVH6428U52F9333GB-AP is an Unbuffered DDR3 SDRAM SODIMM memory module. This module is JEDEC MO-268 R/C F small-outline, dual in-line memory module. A 256 byte serial EEPROM on board can be used to store module information such as timing, configuration, density, etc.

The AVH6428U52F9333GB-AP memory module is 1GByte and organized as a 128MX64 array using (16) 64MX8 DDR3 SDRAMs in lead-free FBGA packages.

All memory modules are fabricated using the latest technology design, eight-layer printed circuit board substrate construction with low ESR decoupling capacitors on-board for high reliability and low noise.

PHYSICAL DIMENSIONS

NOTES: 1- All dimensions are in millimeters (inches)
2- The dimensional drawings are for reference only. Refer to the JEDEC document for additional information.
3- All blue ICs are on the front, and all red ICs are on the back side of the module.
